

Sample MARS reagents and consumables list

Note, this list only gives a general idea of the types of items that you could buy from MARS (i.e., there may be items on the list that are no longer regularly stocked, and conversely we may have items in stock that are not on this list). The only way for you to know what we have in stock is to ask – we will be happy to see if we have the item you are looking for (or a suitable replacement).

The price listed should also be viewed as a general guide (we charge 5% above cost for all aliquots based on what we are currently paying for an item).

If you would like to use a machine and do not know which supplies you might need, please talk to us. We want to help you do your research (and effectively leverage high throughput tools). Email, call, or come by and let us help you!
